DESIGNED TO PERFORM.  
BUILT TO LAST.

Engineering comfort. Enhancing outdoor living.

PARALLEL LINES.  
BETTER SPACES.

## PRODUCT INTRODUCTION

Parallel lines.  
Perfect outdoor living.

It is a new type of sunshade canopy with excellent sunshade, heat insulation, rain proof, wind resistance, stable and durable functions. The precise louver structure technology and drainage system enable the blades to completely block the light and rain after closing, and resist the wind environment of 100km/h to minimize the interference of external weather on the sunshade space. The opening and closing angles of the blades are controlled by the flip of the blades to adjust the light and ventilation. It can also be combined with the lamp belt, ceiling fan and windproof curtain to form an ecological sunshine room, so that you and your family can enjoy high-quality outdoor comfortable life.

# PRODUCT ADVANTAGE

Engineered for performance.  
Built for all seasons.

## 01 GREAT OPEN ANGLE

Blade opening and closing angle up to 150°, according to the demand to adjust shading degree and air intake volume.

## 02 DOUBLE BLADE WITH FLUME

The louvers are equipped with side drainage systems. Even if they are opened after a heavy rain, the water will flow from the blades into the tank without drip.

## 03 HIDDEN DRAINAGE

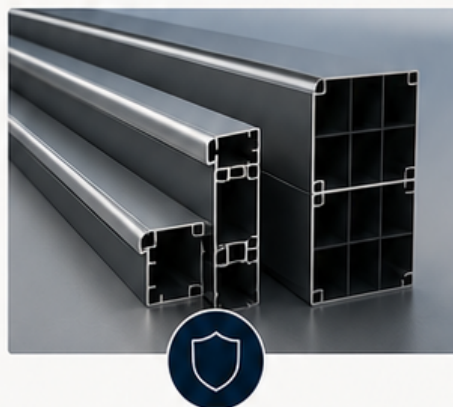

The concealed drainage system allows rainwater to drain directly from the top of the louvers into the columns and then out through underground drainage channels.

## 04 FLAT LOAD 100 KG

Can effectively prevent the surrounding rain splash, the top surface can resist the duration of 2 minutes, the intensity of up to 40–50 ml/s/ square meters of rain. Snow pressure resistance up to 110 kg/square meter.

## 05 ALUMINUM ALLOY & POWDER COATING

Made of high-quality 6063 aluminum alloy, set strong wind pressure resistance, corrosion resistance, deformation resistance in one; Surface high density powder spraying, no corrosion, no maintenance, safety and environmental protection, 20 years do not fade.

## 06 DUAL DRAINAGE SYSTEM

Top surface and side drainage combined design to ensure efficient drainage, keep your outdoor space dry and comfortable all the time.

**HIGH LOAD CAPACITY**  
Engineered to withstand heavy loads up to 100 kg/m<sup>2</sup>.

**WIND RESISTANCE**  
Withstands wind speeds up to 120km/h for safe outdoor living.

**WATERPROOF DESIGN**  
Integrated drainage system keeps rainwater away and your space dry.

**SMART CONTROL**  
Electric or manual operation with remote control for convenience.

**SUPPORT CUSTOMIZATION**  
Multiple sizes and configurations available to meet your needs.

## FLEXIBLE INSTALLATION FOR ANY SPACE

Multiple installation methods to match different environments and structural requirements. Secure, stable and built to last.

**PROFESSIONAL INSTALLATION RECOMMENDED**

Ensure the pergola is installed on a level surface with a solid structure capable of supporting the load.

### 1. FREESTANDING INSTALLATION

Independent structure with four columns. Can be installed anywhere in your outdoor space.

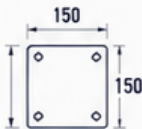

### 2. WALL-MOUNTED INSTALLATION

Mounted to an existing wall with front columns. Ideal for balconies, patios and terraces.

## BASE FIXING OPTIONS

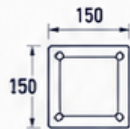

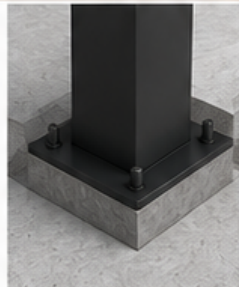

### STANDARD BASE PLATE

150 x 150mm Base Plate

Fix with expansion bolts on concrete floor.

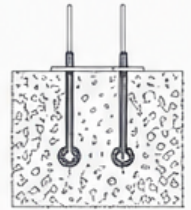

### HIDDEN BASE PLATE

150 x 150mm Hidden Base

Concealed installation for a clean and seamless look.

### GROUND ANCHOR FIXING

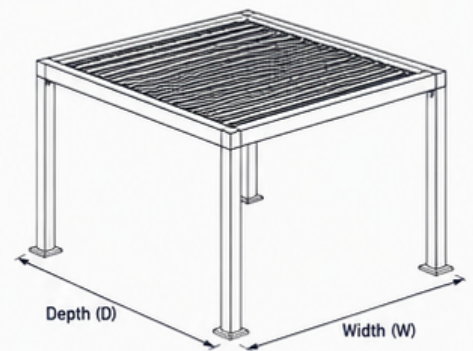

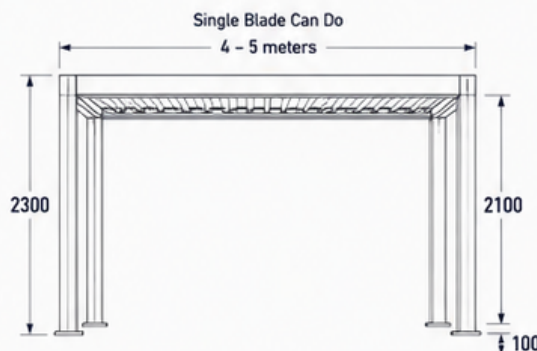

Suitable for soft ground or areas without concrete flooring.

## INSTALLATION NOTES

- Ensure the installation surface is level and solid.
- Use expansion bolts for concrete surfaces (M10 x 100mm recommended).
- Two or more people are recommended for installation.
- Check all components are secure and tighten all screws after installation.
- Follow local building codes and wind load requirements.

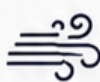

## OVERALL INSTALLATION DIMENSIONS (REFERENCE)

Note: Dimensions are for reference only. Final installation should be based on actual site conditions.

**HIGH LOAD CAPACITY**  
Engineered to withstand heavy loads up to 100 kg/m<sup>2</sup>.

**WIND RESISTANCE**  
Withstands wind speeds up to 120km/h for safe outdoor living.

**WATERPROOF DESIGN**  
Integrated drainage system keeps rainwater away and your space dry.

**SMART CONTROL**  
Electric or manual operation with remote control for convenience.

**SUPPORT CUSTOMIZATION**  
Multiple sizes and configurations available to meet your needs.

## MAINTENANCE GUIDE

Minimal maintenance is required to keep your pergola looking and performing its best for years to come.

**REGULAR CLEANING**  
Clean the aluminum surfaces with mild soap and water to remove dust and dirt.

**AVOID HARSH CHEMICALS**  
Do not use abrasive cleaners or solvents that may damage the powder coating.

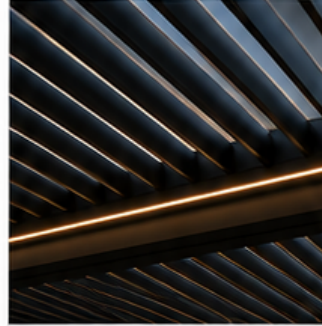

**CHECK FIXINGS**  
Periodically inspect and tighten screws and bolts to ensure stability and safety.

**KEEP DRAINS CLEAR**  
Ensure water drainage channels are free from leaves and debris for proper water flow.

**WINTER CARE**  
In heavy snow regions, remove excess snow from the blades to reduce load.

## OPTIONAL ACCESSORIES

Enhance comfort, functionality and style with our range of optional accessories.

### LED LIGHT STRIP

Integrated LED lighting for a warm and elegant ambiance.

### WINDPROOF CURTAINS

Protects against wind, rain and UV while adding privacy.

### HEATER

Enjoy your outdoor space all year round with adjustable heaters.

### POWER OUTLET

Weatherproof power outlets for convenient outdoor use.

### DRAINAGE SYSTEM

Built-in gutter system efficiently diverts rainwater.

### SMART CONTROL

Remote control operation for blades, lighting and accessories.

## OUR PROJECTS

From private residences to commercial spaces, our pergolas bring value and elegance to every project.

### PRIVATE RESIDENCE

Modern outdoor living space.

### ROOFTOP TERRACE

Stylish comfort with a view.

### RESTAURANT

Enhancing guest experience.

### HOTEL & RESORT

Luxury and relaxation combined.

**HIGH LOAD CAPACITY**  
Engineered to withstand heavy loads up to 100 kg/m<sup>2</sup>.

**WIND RESISTANCE**  
Withstands wind speeds up to 120km/h for safe outdoor living.

**WATERPROOF DESIGN**  
Integrated drainage system keeps rainwater away and your space dry.

**SMART CONTROL**  
Electric or manual operation with remote control for convenience.

**SUPPORT CUSTOMIZATION**  
Multiple sizes and configurations available to meet your needs.

## DESIGNED TO MATCH YOUR VISION

Personalize your pergola to complement your space and style. Choose from a variety of colors, finishes and configurations to create a look that is uniquely yours.

### STANDARD FRAME COLORS

High-quality powder-coated finishes for long-lasting beauty and protection.

Snow Load Capacity	Up to 100 kg/m <sup>2</sup> *
Waterproof Rating	IP65 (Integrated System)
Operating Temperature	-30°C to +60°C
Louver Rotation Angle	0° - 120°
Control System	Remote Control / Wall Switch / Smart App Integration
Certification	CE, ISO 9001, SGS Tested

\*May vary based on size and installation conditions.

### STRUCTURAL DETAILS

### BUILT FOR ALL SEASONS

Designed to withstand the elements and provide comfort all year round.

**WIND RESISTANT**  
Engineered to endure strong wind conditions up to 120 km/h.

**SNOW LOAD**  
Strong enough to support snow loads up to 100 kg/m<sup>2</sup>.

**WATERPROOF**  
Integrated gutters and drainage keep water away and your space dry.

**UV PROTECTION**  
Powder coated finish resists UV rays, fading and corrosion.

### SMART CONTROL OPTIONS

Operate your pergola with ease and convenience.

- ✔ Remote control operation
- ✔ Wall switch control
- ✔ Smartphone app integration
- ✔ Voice control compatible (with smart home systems)
- ✔ Adjust louvers, lighting and accessories effortlessly

### QUALITY YOU CAN TRUST

Premium materials, advanced engineering and rigorous testing ensure your pergola stands strong and looks beautiful for years to come.

## FREQUENTLY ASKED QUESTIONS

**Q: WHAT IS A PARALLELISM PERGOLA MADE OF?**

A: Our pergolas are made from high-quality extruded aluminum (6063-T5) with a powder-coated finish for maximum durability and weather resistance.

**Q: IS THE PERGOLA WATERPROOF?**

A: Yes, the louvered roof system and integrated gutter design effectively direct rainwater away to keep your space dry.

**Q: CAN THE LOUVERS BE ADJUSTED?**

A: Absolutely. The louvers can be adjusted from 0° to 120° to control sunlight, ventilation and shade.

**Q: IS INSTALLATION DIFFICULT?**

A: Our pergolas are designed for easy installation with pre-drilled components and clear instructions. Professional installation is recommended.

**Q: DO YOU OFFER CUSTOM SIZES?**

A: Yes, we offer a range of standard sizes and can also customize dimensions and configurations to meet your specific project requirements.

**Q: WHAT IS THE WARRANTY?**

A: We stand behind our products with a 5-year limited structural warranty and 2-year warranty on components and finishes.
